Basic Training in Software Testing
Instructor: Randy Rice
This is a quick start course in software testing for people just getting into the field, or for people who just need a refresher course or validation for their current testing techniques. This is a practical hands-on seminar to cover the critical path of testing. Your instructor will be a certified instructor in the QA and testing field. You will learn the terminology, process, and challenges of testing in the real world. As a result of attending this seminar, you should have a good working knowledge of software testing and what it takes to design and conduct an effective test of software, regardless of the technology.
Sometimes people feel intimidated by the technical aspects of software testing and lack the confidence they need to be credible test leaders in their organization. Learn the issues and processes for effectively testing software by attending this hands-on course.

Is this your first time here?
Hi! For full access to courses you'll need to take a minute to create a new account for yourself on this web site. Each of the individual courses may also have a one-time "enrolment key", which you won't need until later. Here are the steps:
1. Fill out the New Account form with your details.
2. An email will be immediately sent to your email address.
3. Read your email, and click on the web link it contains.
4. Your account will be confirmed and you will be logged in.
5. Now, select the course you want to participate in.
6. If you are prompted for a "enrolment key" - use the one that your teacher has given you. This will "enrol" you in the course.
7. You can now access the full course. From now on you will only need to enter your personal username and password (in the form on this page) to log in and access any course you have enrolled in.
Start now by creating a new account!

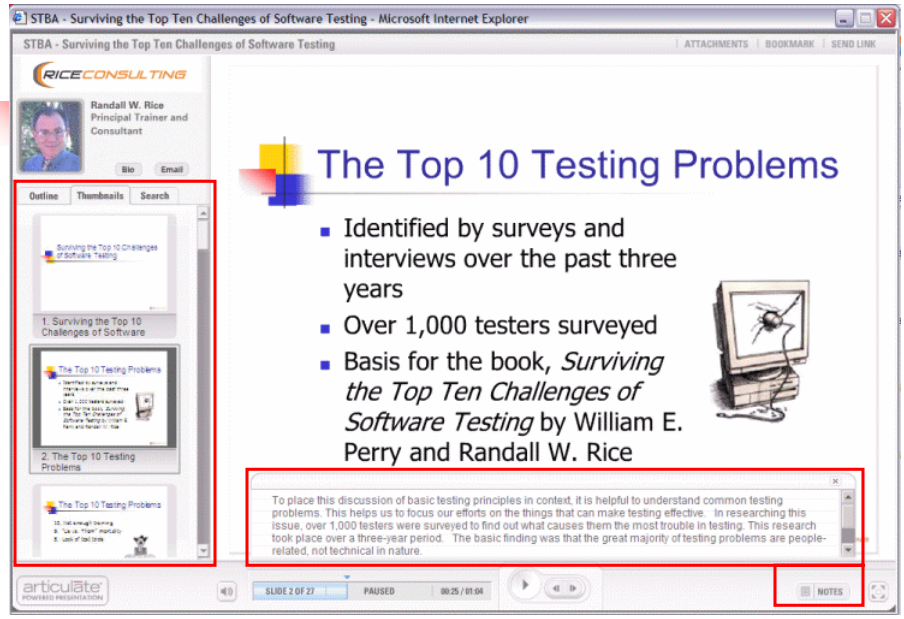
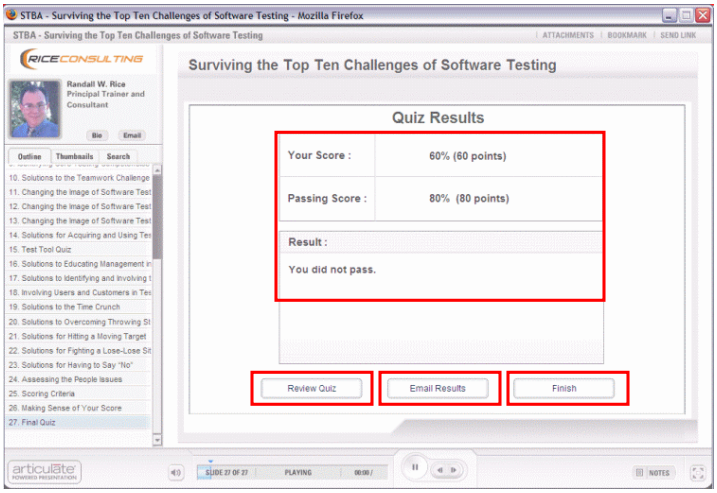
NOTES



Learning Games and Quizes

- Learning games are placed throughout the presentation to help you remember the main points.
- Quizes are at the very end of the module.
  - Most quizes have 10 questions comprised of multiple-choice, matching, true/false, and completion types.

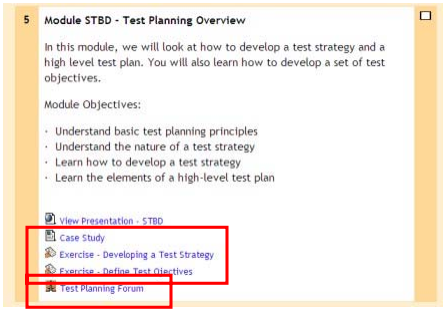
Quizes



Exercises

- The more exercises you do, the more you will learn!
- This course is short on theory, but long on practicality.

Exercise Example



Forums

- When you have a question or comment, feel free to post it to the forums in each module.

Forums

Summary

- We have worked hard to provide you with the very best e-learning experience possible.
- Moodle is a great learning environment.
- We would love to hear your questions and feedback!
