0.1

## BCS / ISTQB Professional Certificates

0.2

## Learning objectives

- the syllabus requires four levels of knowledge:
  - K1: remember, recall (e.g. recognise a definition)
  - K2: understand, give reasons for (e.g. why should testing start early in the life cycle)
  - K3: apply, do, perform (e.g. apply boundary value analysis technique to identify valid boundaries)
  - K4: analyse, separate information into its parts for better understanding, distinguish facts and inferences

0.3

## Test Manager course contents

- 1 Testing Process
  - 2 Test Management
  - 3 Reviews
  - 4 Defect Management
  - 5 Improving the Test Process
  - 6 Test Tools and Automation
  - 7 People Skills
- ISTQB® Exam

0.4

## Course notes

- 1 Testing Process
- 2 Test Management
- 3 Reviews
- 4 Defect Management
- 5 Improving the Test Process
- 6 Test Tools and Automation
- 7 People Skills
- 8 Appendices
  - 1 References
- 9 Glossary
- 10 Syllabus

0.5

## About Grove Consultants

- ◆ UK-based partnership, world-wide clients
  - specialising in software testing since 1989
- ◆ training
  - certificate courses: better pass rates
  - other courses and master-classes
    - management issues, agile, automation, techniques
- ◆ services
  - short, sharp, high-value
  - assessment, guidance, encouragement, pitfall avoidance

*Our depth of knowledge and broad range of clients  
gives us an industry wide perspective on testing*

0.6

## About you ...

- name / company / job / what you do
- how did you get into testing?
- background / experience
  - testing
  - reviews / Inspections
  - programming / test tools
- why are you here?
  - your objectives (besides passing the exam!)
  - questions / problems in testing

0.7

## Session 0

# Contents

<b>Session 0 Contents .....</b>	<b>0-1</b>
<b>Session 1 Testing Process .....</b>	<b>1-1</b>
1.1 Introduction .....	1-2
1.2 Test Planning, Monitoring and Control .....	1-3
1.2.1 Test Planning .....	1-4
1.2.2 Test Monitoring and Control .....	1-7
1.3 Test Analysis .....	1-9
1.4 Test Design.....	1-13
1.5 Test Implementation .....	1-14
1.6 Test Execution .....	1-16
1.7 Evaluating Exit Criteria and Reporting.....	1-17
1.8 Test Closure Activities .....	1-17
<b>Session 2 Test Management .....</b>	<b>2-1</b>
2.1 Introduction .....	2-3
2.2 Test Management in Context .....	2-3
2.2.1 Understanding Testing Stakeholders .....	2-3
2.2.2 Additional Software Development Lifecycle Activities and Work Products .....	2-4
2.2.3 Alignment of Test Activities and Other Lifecycle Activities .....	2-5
2.2.4 Managing Non-Functional Testing.....	2-7
2.2.5 Managing Experience-Based Testing.....	2-8
2.3 Risk-Based Testing and Other Approaches for Test Prioritization and Effort Allocation.....	2-8
2.3.1 Risk-Based Testing.....	2-9
2.3.2 Risk-Based Testing Techniques .....	2-12
2.3.3 Other Techniques for Test Selection .....	2-15
2.3.4 Test Prioritization and Effort Allocation in the Test Process.....	2-16
2.4 Test Documentation and Other Work Products.....	2-17
2.4.1 Test Policy .....	2-17
2.4.2 Test Strategy .....	2-18
2.4.3 Master Test Plan.....	2-20
2.4.4 Level Test Plan .....	2-22
2.4.5 Project Risk Management .....	2-22
2.4.6 Other Test Work Products .....	2-23
2.5 Test Estimation .....	2-23
2.6 Defining and Using Test Metrics.....	2-25
2.7 Business Value of Testing .....	2-29

2.8	Distributed, Outsourced, and Insourced Testing .....	2-30
2.9	Managing the Application of Industry Standards .....	2-31
<b>Session 3 Reviews .....</b>		<b>3-1</b>
3.1	Introduction .....	3-2
3.2	Management Reviews and Audits .....	3-6
3.3	Managing Reviews .....	3-7
3.4	Metrics for Reviews .....	3-9
3.5	Managing Formal Reviews .....	3-10
<b>Session 4 Defect Management.....</b>		<b>1</b>
4.1	Introduction .....	2
4.2	The Defect Lifecycle and the Software Development Lifecycle .....	2
4.2.1	Defect Workflow and States .....	3
4.2.2	Managing Invalid and Duplicate Defect Reports .....	5
4.2.3	Cross-Functional Defect Management .....	5
4.3	Defect Report Information .....	6
4.3.1	Supporting data, categories and classifications .....	6
4.3.2	Defect report management.....	9
4.3.3	Project status assessment.....	9
4.3.4	Process capability assessment .....	10
4.3.5	Considerations.....	10
4.4	Assessing Process Capability with Defect Report Information .....	12
<b>Session 5 Improving the Test Process .....</b>		<b>5-1</b>
5.1	Introduction .....	5-2
5.2	Test Improvement Process.....	5-2
5.2.1	Introduction to Process Improvement.....	5-3
5.2.2	Types of Process Improvement.....	5-4
5.3	Improving the Testing Process .....	5-5
5.3.1	Generic test process improvement model (IDEAL) .....	5-5
5.4	Improving the Testing Process with TMMi.....	5-6
5.5	Improving the Testing Process with TPI Next .....	5-7
5.6	Improving the Testing Process with CTP .....	5-8
5.7	Improving the Testing Process with STEP .....	5-10
<b>Session 6 Test Tools and Automation .....</b>		<b>6-1</b>
6.1	Introduction .....	6-2
6.2	Tool Selection .....	6-2
6.2.1	Open-Source Tools.....	6-2
6.2.2	Custom Tools.....	6-3
6.2.3	Return on Investment (ROI) .....	6-3
6.2.4	Selection Process.....	6-6
6.3	Tool Lifecycle.....	6-8
6.4	Tool Metrics .....	6-9

**Session 7 People Skills – Team Composition ..... 7-1**

- 7.1 Introduction ..... 7-2
- 7.2 Individual Skills ..... 7-2
- 7.3 Test Team Dynamics..... 7-6
- 7.4 Fitting Testing Within an Organization..... 7-9
- 7.5 Motivation ..... 7-12
- 7.6 Communication ..... 7-14
